## 2011 lexus gx 460 towing capacity

The good: Off-road potential Many standard features Towing capability The bad: Gas mileage Premium fuel required Side curtain airbags don't protect third row Starting msrp listed lowest to highest price Base \$53,045 Premium \$57,840 Wondering which trim is right for you? Our 2011 Lexus GX 460 trim comparison will help you decide. Brake override system Seats seven 10 airbags standard Full-time 4WD Optional pre-collision system The GX 460 is Lexus' midsize truck-based SUV. The luxury vehicle features a V-8 engine, and it competes against models like the Land Rover LR4 and Mercedes-Benz M-Class. The GX 460 gets a brake override system and a few minor interior trim changes. The GX 460 has a tall stance. The GX has smooth body sides accented by large front and rear fender flares, and its face has an uncanny resemblance to Subaru's Outback wagon, thanks to similar headlights. Exterior features include: 18-inch wheels standard Rear window can be opened independently of the gate Seven-passenger seating in three rows is standard. The second-row bench seat can slide forward and backward for optimal legroom, and the seat's backrest also reclines. When more cargo room is needed, the standard power-folding third row folds flat with the floor. There are a few minor interior trim changes for 2011. The cabin features a symmetrical dashboard design with a large center control panel finished in silver-colored trim. Interior features include: Standard leather seat trim Standard heated and ventilated power front seats Standard moonroof Optional navigation system Optional Mark Levinson audio system Optional backseat entertainment system The GX's 4.6-liter V-8 makes 301 horsepower and 329 pounds-feet of torque and teams with a six-speed automatic transmission. The full-time four-wheel-drive system incorporates a low range that's designed for off-road excursions. The SUV gets an EPA-estimated 15/20 mpg city/highway. Maximum towing capacity is listed at 6,500 pounds. Ten airbags are standard, including frontal airbags, side-impact airbags for the front and outboard second-row seats, front knee airbags and side curtain airbags for the first two rows of seats. Other safety features include: Standard antilock brakes Standard electronic stability system and active front head restraints Optional Advanced Pre-Collision System, which can tighten the front seat belts and ready the brakes for stronger stopping performance 95% of drivers recommend this car 6500 towing capacity, powerful engine, ultra-comfortable ride, and a classy car. Loaded with every imaginable extra. It has been garaged its entire life except for a few random days. Show full review This is what I was looking for. Stylish inside and out. Not to big, not to small. Has everything I want in an SUV and more. Good towing capacity. 3rd row. If you want great gas mileage this my not be your car, It's about average for a truck SUV. Great family car. Show full review See all 22 consumer reviews Warranty New car program benefits Bumper-to-bumper 48 months/50,000 miles Corrosion 72 months/unlimited distance Powertrain 72 months/70,000 miles Compare the competitors 2011 Toyota Highlander Hybrid 2008 Toyota 4Runner 2012 Toyota FJ Cruiser The Lexus GX460 is definitely a luxury SUV and would qualify as a full size model on top of that, but they are also capable when it comes to their overall towing capacity numbers as well and that's what we dive into in this article.To Be honest, I was quite surprised at the figures I found for these SUVs and after conducting my research found that they were capable of pulling moderately heavy loads which you wouldn't think a luxury vehicle would be able to do. Overview of the Data For the GX460s:Engine Choices: All of the model year GX460's came equipped with the same engine, and that was the 4.6l (V8). This is probably why the overall capacity numbers really didn't differ throughout the years, as the same engine was equipped.Variations: There we're no variations in the vehicles that affected the capacity numbers overall, except for the trailer itself. If your trailer did not have its own braking system equipped, then the maximum capacity was drastically reduced Play Mirror 1000 lbs.Towing Capacity: From 2021-2010, the towing capacity didn't really change that much, in fact it stayed the exact same throughout the years. Nothing seemed to affect the capacity numbers that I usually see from other manufacturers vehicles like engine choices, transmission equipped, Etc. Many have the model year shared the same weight specifications so rather than posting duplicate information, I just posted one image for each bit of info that applies to all model years.Remember to read the owner's manual for your specific GX460 so that you understand the manufacturer's recommendations when it comes to pulling trailers. The 2021-2010 Lexus GX460s had the same towing capacity ratings throughout all of these model years and ranged between 1,000-6,500 pounds.The smaller weight rating was specifically for trailers that did not have their own brake system installed.Nearly all of the other specifications were exactly the same, with minor differences in vehicle capacity numbers for certain years. Remember that if you are pulling a trailer, the tongue weight will a tribute to the vehicle capacity weight and you will have to deduct the tongue weight from the maximum capacity weight of the vehicle to get an accurate figure.2021 Lexus Gx460 Towing ChartLexus Gx460 Tongue WeightLexus Gx460 Sway Control And Weight Distribution Hitch There a few requirements made by Lexus when pulling trailers that I had a specific weight. One of the requirements we already talked about, and that is having trailer brakes installed for anything that weighs over 1,000 pounds.Two other requirements I found in the owner's manual state that if the trailer weighs over two thousand pounds, some sort of sway control device is required and at the trailer weighs over 5,000 lb, then you will need to use a weight distributing hitch.It is always a good idea to adhere to the manufacturer's guidelines for safety reasons and to ensure that your vehicle will be covered under its warranty, if you have one.For model years 2012-2021, I was able to find the gross combined weight rating in the manuals and this was the same figure for all model years, set at 13,100 pounds.The manuals also provided other helpful information when it came to towing, like the break-in. For new vehicles, Lexus recommends not hauling anything for the first 500 miles, if you happen to buy a new vehicle with little to no miles on it.If the vehicle is used and has more than 500 miles on it, then obviously this break-in period does not apply to your vehicle. Last updated on July 21st, 2021 at 05:03 am It is the same for all trims. The maximum weight that Lexus GX 460 is allowed to tow. The maximum trailer weights listed are only applicable for altitudes up to 3280 ft (1,000 m) above sea level. With increasing altitude the engine power and therefore the car's climbing ability are impaired because of the reduced air density, so the maximum trailer weight has to be reduced accordingly. The weight of the car and trailer must be reduced by 10% for every further 3280 ft (1,000 m) (or part thereof). It is the same for all trims. This is the maximum amount of weight Lexus GX 460 is rated to carry (engine, chassis, fluids, passengers, cargo, load - everything). It is often determined by the manufacturer and is indicated in the owner's manual or on the inside of the drive's door panel. This is how much Lexus GX 460 weighs sitting on the curb with no driver, passengers, no cargo and no load with all standard options. Payload is considered all the extra stuff you put inside your vehicle, whether it be passengers or a pile of rocks, that weight is all considered payload. You can increase it by: 1) Upgrading the Rear Springs. 2) Adding Coil-Over Shock Absorbers. 3) Installing a Longer Truck Bed. 4) Attaching a Trailer. 5) Adding Bed Racks. It is the maximum allowable weight that can be placed on a front axle of your Lexus GX 460. It is the maximum allowable weight that can be placed on a rear axle of your Lexus GX 460. If you already own a Lexus GX 460 and you are looking for the perfect boat that you can tow to your favorite lake or marina, this is the article for you. Or, if you are doing research on what SUV can tow your boat, you will want to keep reading as a Lexus GX 460 has a lot of towing capacity and some serious benefits. This article will help you determine not only how much boat you can tow, but also what you will need to get the most towing capacity out of your Lexus GX 460. What Is The Max Towing Capacity Of The Lexus GX 460? A 2020 Lexus GX 460 can tow up to 6,500 pounds, meaning it can tow less than 6,000 pounds of dry weight. Many boats can be towed by a Lexus GX 460, including PWCs (or personal watercraft, small sailboats, ski boats, small cabin cruisers, small speed boats, pontoon boats, and small fishing boats. The most important aspect to think about when determining what boat to buy or if a Lexus GX 460 is right for you is determining what the total weight of your load will be. The 6,500 pounds must include a trailer, gear, fuel, and water weight. Do not buy a boat with a dry weight of 6,500 pounds, as a Lexus GX 460 will not be able to tow that boat. If your boat is at or close to that number, there are other SUVs and trucks that can do the job, which you can check out on this list. If you still have questions if the Lexus GX 460 is right for you, or what kind of boat you can buy for your Lexus GX 460, you have come to the right place. This guide will give you examples of what boats you can tow, as well as making sure you have the right gear to tow your boat safely. Determining the Towing Capacity It is important to ensure that the towing capacity of your Lexus GX 460 is indeed 6,500 pounds, as this can vary with the equipment that comes with your vehicle, as well as what shape it is in. However, the max towing capacity for the Lexus GX 460 has been 6,500 pounds since 2009, meaning you should have a pretty good idea of what you will be able to tow. The Benefits of Towing with a Lexus GX 460 While the Lexus GX 460 does not have the highest tow load in its class, it does come with some serious perks that are standard that make towing a breeze. Not to mention, these standard trim items are going to make towing your boat a lot safer for you, your family, and others on the road. A 2020 Lexus GX 460 comes with 329 lb-ft of torque at low RPM, enabling it to tow up to 6,500 pounds. The Trailer Sway Control offers peace of mind as part of the Vehicle Stability Control System. To help control the sway that can happen when towing large loads such as boats, braking is applied to each individual wheel and the throttle can be moderated. The driver will know if this is occurring as a flashing indicator will alert him or her when the system is taking corrective measures. Considerations Before Towing With a Lexus GX 460 While the Lexus GX 460 has one of the highest tow loads in its class, it is important not to take that for granted and buy the appropriate equipment. This includes the hitch ball and ball mounting, as well as weight-distributing accessories. If you do not buy weight-distributing accessories, you may limit the maximum load that your Lexus GX 460 can tow. These items can include equalizing arms, snap-up brackets, and sway control systems. These purchases will help ensure that you are towing your boat properly and won't run into any issues or costly accidents. Examples of Boats a Lexus GX 460 Can Tow If you already own a Lexus GX 460 and are looking for inspiration about the types of boats that you can buy, the rest of this article will help guide you towards the perfect purchase for your boating needs. PWC's or Personal Watercraft Your Lexus GX 460 will be able to handle most PWC's easily. For most models, you may even be able to tow 2-4 depending on you and your family's needs. Some of our top personal watercraft are: Kawasaki Ultra 310 LX - 1,074 poundsFX Cruiser HO Full - 838 poundsSea-Doo Spark - 450 pounds As you can see, your Lexus GX 460 will be able to handle multiple items of a lighter option like the Sea-Doo Spark even when they are fully fueled. Sailboats The standard weight of a sailboat is 8,800 pounds. This means that you need to be very careful when choosing a sailboat that can be towed by your Lexus GX 460 as many options will be too heavy to be towed, especially at their wet weight. This is a category where dry vs wet weight will be important, as you will need to factor in the weight of fuel, freshwater, gear, and the trailer itself. Here are a few options of sailboats that your Lexus GX 460 will be able to handle at their wet weight with ease: Sunfish - 120 poundsC&C 27 - 5,180 poundsMacGregor 26 - 2,550 poundsHunter 260 - 3000 poundsCatalina 250 - 4,200 pounds While all of these options come in well below the maximum weight that your Lexus GX 460 can tow, it is very important to realize that you will need to factor in potentially over 100 gallons of both freshwater storage and fuel weight. Speed Boats The best part about speed boats is that, as they are built for speed, they are often constructed to be super lightweight. This means that you can get a whole lot of boat and still hit under the max capacity to tow behind your Lexus GX 460. Some of our favorite options that can be easily towed with your Lexus GX 460 are: Yamaha SX 210 - 3,172 poundsYamaha AR210 - 3,228 poundsYamaha 212 Limited S - 3,598 poundsThunder Cat 32 - 5,400 pounds Similarly to Sailboats, it is very important to not only calculate fuel and freshwater storage, but also trailer weight when picking your new speed boat. Cabin Cruisers If you are looking to take long but comfortable sea journeys with your family, or even just want a nice boat that can seat many people comfortably both inside and outside, this is the type of boat you will want to buy to accompany your Lexus GX 460. These boats can be very luxurious, but there are quite a few options that you will be able to safely tow. Our favorites include: Stingray 250CS Mid-Cabin Cruiser - 4,971 poundsParker 750 Cabin Cruiser - 4,100 poundsC-Dory 22' Cruiser - 2,600 poundsJeanneau NC 895 Sport - 3,300 pounds You must be careful when choosing a cabin cruiser to be towed by your Lexus GX 460 as many of them come in at 8,000 pounds or more dry weight. However, the options above should get you well on your way to finding the perfect cabin cruiser for you so that you can take weekend and overnight sea voyages with your family and friends. Deck Boats Sometimes, all you need is a deck boat to have some weekend fun fishing or doing watersports. There are plenty of options for deck boats that can be pulled by your Lexus GX 460. While you most likely won't be storing freshwater, it is important to factor in the weight of any fishing or watersports gear as well as fuel weight when calculating what deck boat is right for you. Here are a few that we recommend: Tahoe 1950 - 3135 poundsTahoe 250 Xi - 3350 poundsTahoe 2150 - 3235 poundsBoston Whaler 170 Montauk - 2,254 poundsBayliner Element E21 - 3350 pounds While these deck boats are all fairly heavy - each clocking in around 3,000 pounds - it is easy to see that there are many options on the market that can be towed by a Lexus GX 460 with full gear and a fuel load. The Bottom Line While the Lexus GX 460 does not have the highest tow load capacity in its class, it is able to tow many different boat options, making it a great vehicle for those who like luxury and want a boat that they can take out on the weekends spending quality time with their family. For the average person, this will be more than enough vehicle for the boat they want to purchase. If you need an SUV for your family, but need more towing capacity, looking at other luxury SUVs such as the Lincoln Navigator will be a good start. If you are not attached to the idea of an SUV, and you want a really big boat, then you will get much more towing capacity with a truck. You can use this guide to find the vehicle, be it truck or SUV, that's right for you.
